

Prime Alternative Finance (PRALTF) is an experienced investor Fund which seeks to focus on asset-based direct lending by investing in a diversified portfolio consisting of rural, commercial and industrial loans, leases and finance agreements in the United Kingdom. The strategy is an absolute return - alternative investment designed to outperform traditional equity and fixed income based investments in terms of annualised market based risk. This is achieved by investing in a portfolio that carefully manages individual client and sector asset allocation risk to generate a steady stream of interest income with a low default risk both in individual cases and the wider asset class. The majority of lending will be secured on assets (typically specialist machinery, equipment, vehicles and, increasingly, renewable energy and waste to energy) together with personal guarantees and substantial initial deposits from the borrowing customer.

All lending within the Fund is procured and administered by a specialist UK based, licensed Finance Company which uses sophisticated lending systems and procedures to evaluate potential lending which are also often used by rural lending desks of major financial institutions. Extensive customer background checking, research and credit scoring is conducted before each loan/lease finance agreement goes live, and Team Prestige often meets many of the largest customers personally in addition to the Fund's main counterparty/finance arranger. Members of the lending team have extensive direct lending experience at major financial institutions in the UK working within the asset-backed direct lending divisions, specifically focused on rural and commercial finance. Over the medium-term, the investment strategy has consistently retained near zero volatility and near zero correlation to traditional equity markets and regularly outperformed them on an absolute return basis.

- Invests in a diversified portfolio of asset based, finance lending and leasing agreements
- Focuses on secured agricultural, commercial and industrial agreements only in the United Kingdom
- Niche strategy - low target volatility and correlation to traditional equity, bond or commodity markets
- Target capital appreciation: 5% - 6% p.a.
- Target annualised volatility: 1% p.a.

Cumulative Performance

PRALTF USD vs. US S&P Treasury Bond Index USD vs. US Bank Rate USD: 12/2018 - 09/2020
